

gender pay gap report 2022

For EMCOR Group (UK) plc
(EMCOR UK)

introduction

At EMCOR UK we believe improving equality and gender balance in the workplace is not only the right thing to do; it enables our employees and our business to perform better and grow.

We welcome the opportunity to review and report on our sixth gender pay gap report, published in April 2023 and covering the year 2022. In this report we are able to reflect on a number of positive changes to our results.

With legislative pressure on large UK businesses, there continues to be a growing impetus to address gender inequality and job role stereotyping in the workplace. This is something at EMCOR UK that we welcome as not only is it morally correct, but is also good for our business in helping to ensure we are an open and inclusive employer.

We know that the facilities management (FM) sector has historically been largely occupied by male employees due to the types of skills required to deliver services and trade based roles like plumbers which have tended to attract more men than women within our industry. We continue to work to try and change that through various ways, such as attending schools and colleges to promote our industry sector.

As with the previous year this Gender Pay Gap Report is not a measure of equal pay for the same job between men and women; it measures the average difference between the pay of all of our men and women irrespective of job type.

Publishing our gender pay gap report is an important step towards creating a more inclusive workplace in which everyone can flourish and progress in their career.

EMCOR UK is totally committed to gender equality and diversity in the workplace and has already rolled out a number of key programmes and initiatives in support of this.

EMCOR UK's gender pay gap

The law requires every company in the UK with more than 250 employees to report its gender pay gap in accordance with the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017 ("the Regulations").

This report has been produced with reference to the Regulations and the associated guidance issued by ACAS and the Government Equalities Office, entitled Managing Gender Pay Reporting.

The Regulations require all organisations to make calculations based on employee gender on an annual basis. We have completed our annual calculations using our HR and payroll records supported by an external pay consultant.

We are required to carry out calculations that show the difference between the average earnings of men and women in our organisation. The results can be seen in the table below.

Pay gap

Male employees earn on average (mean) **30%** more than female employees

Male employees earn **39%** more than female employees (median)

Bonus

14.3% of men received a bonus

12.2% of women received a bonus

Average (mean) male bonus earnings are **56%** higher than female bonus earnings

Median male bonus earnings are **-14%** lower than female bonus earnings

Gender breakdown per pay quartile

Quartile A Lower Paid

43.4% Male
56.6% Female

Quartile B Lower Middle

58.1% Male
41.9% Female

Quartile C Upper Middle

82.8% Male
17.2% Female

Quartile D Upper Paid

84.9% Male
15.1% Female

The table above shows the combined gender pay gap figure on 5 April 2022 for EMCOR UK

understanding the gender pay gap at EMCOR UK

We would like to see more women in senior, technical or skilled trade roles such as engineers – areas where women are under represented.

In many of the professions utilised across our sector (such as plumbing and engineering) women are under-represented. While this is slowly changing, there are still fewer females than males commencing apprenticeships in these trades or studying STEM subjects (science, engineering, technology and maths) at school and university.

Our own internal research also shows that an imbalance of either men or women is particularly significant for some types of job.

For example, cleaning roles (which tend to be lower paid) are largely occupied by female employees, and engineering (which is higher paid) is predominately occupied by men.

We would like to see more women in our business, in our industry sector, and in all the professions that have been historically occupied by male workers. At present, 33% of our workforce are women, but we still need more women to apply for roles traditionally occupied by men.

We also need to see a step change in the numbers of women studying STEM subjects or training to work in skilled trades as this should eventually lead to an increase in the number of women working in more highly paid roles within the FM sector.

Going forward, we remain committed to improving our gender balance by actively recruiting and retaining more women in our business.

the steps we are taking

EMCOR UK's commitment to equality, diversity and gender balance is well-established and led by our Creating Balance forum.

In 2016 we set up the Creating Balance Forum; a collection of employees from across our grading structure, working to improve the gender and diversity balance at EMCOR UK.

Since its inception, the Creating Balance Forum has been led by three senior, female employees and most recently we elevated the status of the role of our Head of ED&I to an Executive Director position, to ensure we keep the focus of our efforts at Executive Level. Under their leadership - and fully supported by EMCOR UK's Executive Leadership Team - gender equality and diversity initiatives have continued to be developed and driven throughout our business.

Our Creating Balance Forum is in place to identify barriers to gender equality and inform priorities for action.

Our overall workforce profile is predominantly male, which is typical in the FM sector. We remain committed to improving our gender balance and are taking steps to address it.

Initiatives delivered in support of our Creating Balance activities have been:

- ▲ A return to work incentive paid to new mothers returning from maternity leave.
- ▲ In January 2022 we introduced enhanced Maternity and Paternity pay as per the below:
 - Maternity Pay at 26 weeks full pay, 13 weeks SSP and 13 weeks unpaid
 - Paternity Pay enhanced to 6 weeks full pay
 - Pregnancy loss (including terminations) 2 weeks paid leave
- ▲ A review of our home working and flexible working policies to make it easier for women to balance their work life around children.
- ▲ The removal of names and reference to gender on CVs to eliminate unconscious bias.
- ▲ Building our employer recruitment brand to attract more women into senior roles and skilled trades; and elevating the profile of our female ambassadors and role models to help inspire colleagues and to attract female talent.
- ▲ Alongside this we have looked to work with schools and colleges to try and help address some of the gender stereotyping at an early age, as well as promoting the FM market as a career path through the Inspiring The Future campaigns.
- ▲ We have created a new grading structure to ensure transparency in our approach to reward and recognition.
- ▲ Our Succession Planning & Talent Management process has also been revised to ensure develop opportunities can be met by our internal talent regardless of gender.

These are just some of the great initiatives that EMCOR UK have been working through to ensure our gender pay gap is being addressed.

Whilst these initiatives will help towards improving our gender pay gap, we need many more women to train, and apply for, roles traditionally occupied by men to make a significant difference. In the meantime, the Creating Balance Forum will continue to implement gender, equality and diversity initiatives.

equality matters to EMCOR UK

We value diversity, equality and inclusion and believe it contributes to the continued success of our business. We also want to attract and retain a workforce that reflects the customers and communities we serve.

Closing the gender pay gap is a challenge for most organisations. Our senior leadership team has a clear strategy in place to try and overcome this challenge.

The data in this document is accurate and in line with Government reporting regulations.
