James Dunnett

Chief Information & Transformation Officer

James has over 28 years' experience in developing and deploying IT solutions into Engineering and Facilities Management companies. He has extensive experience in Information Security controls and governance managing our solutions to ISO27001, ISO22301 and Cyber Essentials Plus standards. This experience has allowed EMCOR UK to safely and securely deploy these solutions into highly secure supplier environments, specifically CNI.

James likes to challenge the status quo and is always looking for how we can continually improve as a business and as a team, by bringing structure and technology solutions to the table, that help shape the vision of EMCOR UK. Educated in Physics & Maths at Durham University, James is a digital change consultant, providing decades of experience of data science and software development to create bespoke and unique solutions for our customers.

He now forms part of the Executive Leadership Team where he leads both the IT functions and our Business Transformation teams.

For James a better world at work means, optimising the facilities our customers work in. To use our systems and expertise to achieve the best balance of employee experience, business performance and cost to deliver the outcomes our customers desire. To create a better world at work through insightful use of data and analytic techniques in the complex world of Facilities Management.

Outside of work, James enjoys cycling, running and spending time with his three boys.
